

Sustainable Procurement Policy

1. OVERVIEW

Colorcorp Pty Ltd considers sustainable procurement to be an integral part of its commitment to the company's Environmental and Social Sustainability Management Plan. In maintaining our Corporate social Responsibility management Colorcorp's procurement team will seek to:

- Procure functionally sustainable products and raw materials in compliance with environmental and social laws and regulations.
- Have regard for the environment and social responsibility when purchasing goods and services, and promote suppliers whose sustainability policies and practices are in accordance with our own.
- Ensure clients are well informed and kept up-to-date with alternate environmentally friendly materials and processes.
- Endeavour to offer the best / lowest cost available for environmentally-friendly products in an effort to be comparable to their non environmentally-friendly products.
- Provide instruction / training / awareness to ensure that all clients, stakeholders and shareholders are aware of how they can be part of, and contribute to the on-going performance of sustainability management.
- Promote waste minimisation, and minimise the impact of waste by promoting reuse and recycling where appropriate.
- Consider the carbon footprint of our manufacturing processes and engage in continuous improvement to source ways to reduce this footprint.

Implementation of this policy will only be achieved by securing the support of staff at all levels, working for and on behalf of Colorcorp Pty Ltd, and through the development, implementation and regular review of our policies and procedures.
